ZAJIL TELECOM

Zajil Telecom is a leading information technology and communication service provider in the MENA region. Established in the State of Kuwait since 1991, Zajil is Kuwait's first Internet Service Provider and the region's leading MPLS Service Provider. Zajil owns and operates one of the largest and most resilient MPLS network in the region with more than 34 POPs globally. Zajil operates five data centres across the GCC region and one in the UK; offering Co-location and Cloud Services to major corporate clients from various industry segments. Zajil was one of the earliest entrants in the Cloud & Managed Services market.

eHosting Datafort
