→ eHosting DataFort took the managed services award.

MANAGED SERVICES PROVIDER OF THE YEAR

eHosting DataFort

EHosting DataFort took the honours in the Managed Services Provider of the Year Award, an award which acknowledges the company that has that have invested in its capabilities to deliver trusted solutions and to give its customers access to latest technologies to a global standard.

The judges selected eHDF based on its diverse customer base; its strong presence and established operations in the UAE, its deployment of new solutions to address market requirements such as its innovative public cloud services, and its ongoing expansion to support its customers.

eHDF has also shown continued investment in its data centre facilities and infrastructure, to provide world class capabilities for its customer organisations.

ENTERPRISE HARDWARE & SYSTEMS VENDOR OF THE YEAR

Huawei Enterprise

The award for Enterprise Hardware & Systems Vendor of the Year, was won by Huawei Enterprise. This award recognises both the technical expertise of the vendor's portfolio, and also its strength in the region in a number of different areas.

The judges noted Huawei's commitment and investment to support its Middle East customers, particularly in important vertical sectors such as government and education, as well as its strength in developing new solutions to help regional organisations to tackle new challenges in these verticals. The judges were also impressed by the winner's growing partner infrastructure and rapidly expanding customer base.
